

Knowledge checks (not graded)

The following questions are ungraded. They are here to self-check your understanding of the concepts.

STYLE RULE FOR THE FOLLOWING QUESTIONS:

```
p {  
border: 2px solid black;  
background-color: rgb(150, 50, 20);  
}
```

1. Color flush

Examine the style rule above. Will the color always run flush to the border or will there sometimes be a gap?

☐ Always flush

☐ Sometimes a gap

CHECK

2. Extend flush

We add a second style rule: `p { padding: 20px; }`. Will the background color still extend flush without a gap to the border?

☐ Yes, always flush

☐ No, there will be a gap

CHECK

STYLE RULE FOR THE FOLLOWING QUESTION:

```
div {  
  border: 2px solid black;  
  background-image: url('images/sumptuous_eyes.jpg');  
}
```

3. Which of these statements are true?

Which of these statements are true? Check all that qualify.

☐ As written above, the image would fill the `<div>` flush to the border without gaps. The image will tile/repeat if necessary.

☐ As written above, the image will stretch as necessary to fill the `<div>` flush to the border without gaps.

☐ With the additional style rule of `background-repeat: no-repeat;` we could potentially introduce a gap between the image and the border.

CHECK

4. Larger

If you need to make an element a little larger, which property should you use?

CHECK

5. Extra space

If a border or box-shadow is too snug to the content, what property can you use to get some extra space?

CHECK

6. Padding property

Will the `padding` property have any effect on the `text-shadow` property?

☐ No

☐ Yes

CHECK

7. Negative padding

Can negative `padding` be used to make an element smaller?

☐ No

☐ Yes

CHECK
