

Week 5 - Content

5.1 Introduction: This week, you will be combining HTML and CSS to create more complex pages.

5.2 Tables: Tables can be a great way of organizing your content — learn when to use tables, and when to avoid them.

5.3 Multimedia: Learn the best methods for including audio and video in your page.

5.4 Embedding content: Learn about iframes and some advanced image tag attributes, ismap and usemap. **Note:** *This section is optional material included for the curious. It will not appear on any graded question.*

5.5 CSS tricks: Here, we will introduce some next level methods for making awesome Web pages.

5.5 Recipe project: Dale walks through separating your CSS and HTML into their own files for cleaner, easier coding.

5.6 Exercises - Week 5: Test your knowledge of this week's material.
