

Activity

Using your favorite browser, navigate to [Wikipedia.org](https://www.wikipedia.org). Using the debugger, change the title and header of the page to "My Wikipedia" and change the background to light green.

(Hint, use "Inspect" or "Inspect Element" to bring up the debugger).

In another browser window, open up [Wikipedia.org](https://www.wikipedia.org). Does it look like the one you've modified? Why or why not? Did you just break Wikipedia for the rest of the world?
