

# Week 1 - Content

**1.1 Introduction:** A video that introduces the content of Week 1.

**1.2 The big three:** Learn about the basic tools you will use to code for the Web including hypertext and Web browsers.

**1.3 Elements, tags and attributes:** Here you will begin learning about the functions of the different types of code.

**1.4 Character encoding:** To make you familiarized with international features.

**1.5 Best practices, the wisdom:** Studying other peoples mistakes is a great way to avoid the same pitfalls.

**1.6 More on tags:** Review of the tags we have just learned about and get started on your course project.

**1.7 Test your knowledge:** Try out these quizzes on all the things that you have learned in week one.
