

Activity 3 - Basic flexbox

There are several more flexbox related properties that we will learn. But already there is much that can be accomplished with only `display:flex`, `flex-flow` and `flex`. So let's explore.

The project file that is used in this demonstration can be [downloaded directly](#). The file we edit is `www/index.html`

The final version is also [available for download](#). Both are project files that can be opened in the [Intel XDK](#).

NOTE: *This activity is best conducted in the XDK (or in CodePen), **not in the discussion forum** below. The discussion forum includes its own stylesheet which may override the styles you want to experiment with.*
