Using Intel® XDK

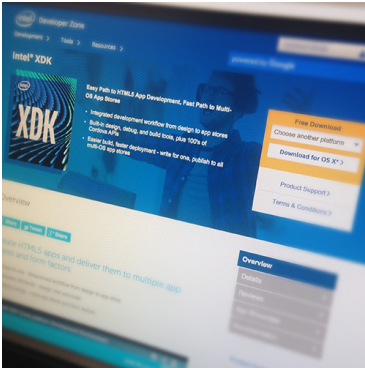

IN THIS COURSE, WE'LL BE USING THE INTEL® XDK TOOL TO SHOW EXAMPLES AND PROVIDE SAMPLES, SO IT IS HIGHLY RECOMMENDED THAT YOU DOWNLOAD AND TRY IT.

The Intel XDK is a tool for building web apps as well as hybrid mobile Web apps. We will be using it just for creating simple Web pages, so there are parts of the XDK that we won't be using. Of course, we always encourage you to experiment.
